PERSONAL PROFILE

I am a 3rd year PHD student at the University of Perugia and my research interests are innovation and the labour share.

EDUCATION

- Master in International Economics (distinction)-University of Perugia
- Erasmus Plus-Tuebingen School of Business and Economics
- Bachelor in International Relations (distinction)-University of Perugia

PROFESSIONAL EXPERIENCE

- Lecturer in Seminar, University of Perugia “R&D and Firm-Level Labour Share” (20/11/2018)
- Visiting PHD student at CEP (LSE), London, UK (April 2018-July 2018)
- Research assistant at the University of Tuebingen, Germany (October 2016-February 2017)

PROFESSIONAL MEMBERSHIPS

- Associate Member at Centre for Economic Performance from April 2018 to August 2018
- Member of the CEP Labour Markets Research Programme
- SIDE member

RESEARCH

- R&D and firm-level labour share: this project aims at investigating the effect of R&D on the firm-level labour share. It is focused on EU firms in the manufacturing sector and data are obtained combining EFIGE with AMADEUS.
- The effects of automation on different groups of workers: this project intends to understand the effect of robot density on the labour share of different workers' categories (e.g. males and females, skilled and unskilled workers, high-educated and low-educated workers). The dataset is obtained combining EUKLEMS with IFR.
- Labour Market Institutions and the Labour share: this project is aimed at understanding the effects of different institutional settings (especially EPL and bargaining systems) on the labour share all else being equal (especially for what concerns the technology of production).

TEACHING

- Tutor in Statistics at the University of Perugia – from January 2017 to June 2017

CONFERENCES and COURSES ATTENDED

- May 2017: Invited Lecture of Paul de Grauwe on The Future of the Euro (from LSE) University of Perugia, Perugia;
- May 2017: Bureau van Dijk Electronic Publishing on AMADEUS, University of Perugia, Perugia;
- June 2017: V Summer School in Statistics for Economics T-Stat, Florence;
- December 2018: 'L'indagine sui bilanci delle famiglie italiane: aspetti metodologici e principali utilizzi. Andrea Neri (Bank of Italy), University of Perugia, Perugia;
- March 2018: 'Le forme giuridiche del decentramento produttivo: impresa e forced labour'. Francesco Buccellato, University of Perugia, Perugia;
- March 2018: 'Inconsapevole utilizzo del forced labour: rischio danni e obblighi gestori'. Francesco Buccellato, University of Perugia, Perugia;
- March 2018: 'The benefits of using disaggregated trade flows in empirical research: development, discussion and examples'. Stephan Huber (from University of Regensburg), University of Perugia, Perugia;
- April 2018: 'The origins of populism: evidence from the Great Recession and immigration crisis in the U.S.A'. Shuai Chen (from Tilburg University), CEP, London;
- May 2018: 'Sudden stops, productivity and the exchange rate'. Laura Castillo Martinez (from LSE&CFM), CEP, London;
- May 2018: 'Globalisation for sale'. Paola Conconi (from ULB&ECARES), CEP, London;
- May 2018: 'Decoding teams: team output and individual productivity in science and invention'. Ben Jones (from Kellogg School of Management), CEP, London;
- May 2018: 'Changes in social network structure in response to exposure to formal credit markets'. Esther Duflo (from MIT), CEP, London;
- May 2018: 'Engines of growth: railroads, reallocation and the rise of American manufacturing'. Richard Hornbeck (from the University of Chicago Booth School of Business), CEP, London;
- May 2018: 'Performance pay of financial advisers'. Jordi Blanes I Vidal (LSE), CEP, London;
- May 2018: 'The origins of firm heterogeneity: a production network approach'. Andrew Bernard (Tuck School of Business), CEP, London;
- May 2018: 'Technology, market structure and the gains from trade'. Gianmario Impulliti (Nottingham & LSE), CEP, London;
- June 2018: 'Marriage, labour supply and the dynamics of the social safety net'. Alessandra Voena (University of Chicago), CEP, LSE;
- April 2018-July 2018: Labour Market Workshops, CEP, LSE;
- November 2018: 'Simple regression methods for secondary analysis of datasets that cannot be linked without errors'. Li Chun-Zhang (from University of Southampton), University of Perugia, Perugia.
