Main subject studied: Actuarial Math, Econometrics, Credit Scoring, Quantitative Finance.

University of Perugia Dec 2008
Bachelor's Degree in Statistics & Computer Science, Department of Economics
Main subject studied: Statistical Models, Statistical softwares (R, Stata), Sampling Theory.

EXPERIENCE

IRPET Nov 2013 - Oct 2014
Junior Researcher
Fellowship in data analysis related to companies and people. I was involved in a survey about a comparison between two types of firms: high-growth vs low-growth. The goal was to spot different features about the two groups to explain the difference of performance. A case control study was implemented based on a specific questionnaire about management practises and learning. ATT Average Treatment Effect on the Treated was calculated for each variable included on the questionnaire, with p-values. Results show that the goal has been reached.

University of Perugia Nov 2011 - Jul 2012
Statistics Tutor
Solving exercises in the classroom about descriptive and inferential statistics.
